

TEMPO: The Future of Time

Scheduling that flows around your life, not against it.

Calendars are Broken

Standard calendars treat your time as a static grid. But life is chaotic.

We struggle to balance **Hard Appointments** with **Fluid Projects**, leading to burnout and missed deadlines.

When life changes, your calendar stays frozen. You need a system that breathes.

Meet Tempo

Tempo is the first **Constraint-Based Temporal Engine**.

It calculates your schedule **backwards** from your goals, fitting tasks into the actual gaps of your availability.

Stop prioritizing your schedule; start scheduling your priorities with intelligent automation.

30:00

Boulders and Water

Three Layers of Logic

- 1. Anchored Events:** The heavy boulders that define the structure.
- 2. Recurring Pulse:** The steady heartbeat of mandatory tasks.
- 3. Fluid Content:** The water that flows into every available crevice.

The Boulders: Hard Dates

Appointments

Non-negotiable time blocks like doctor visits or meetings. The system locks these first.

Hard Deadlines

"Must be done by" constraints. Tempo ensures these are met by working backward from the date.

Immovable

These events dictate the flow. No fluid task will ever overwrite a Boulder.

The Pulse: Recurring Tasks

Mandatory weekly obligations like university labs or Sunday prep. Tempo maps the **intensity** of your recurring commitments, pausing them automatically for holidays.

The Water: Fluid Tasks

- 💧 **Sequential Splitting:** Break a 30-chapter book into even daily chunks based on actual free time.
- 💧 **Atomic Checklists:** "Pack shoes" or "Buy gift" items that sprinkle into small schedule gaps.
- 💧 **Dynamic Sizing:** If Saturday is free, Tempo gives you 4 chapters. If Tuesday is busy, you get 0.
- 💧 **Rebalancing:** Missed a day? Tempo instantly shifts the remaining workload across the future.

True Availability Mapping

Tempo understands you aren't a robot. The onboarding wizard builds your environment:

- **Variable Rosters:** Support for 4-on/4-off shift patterns.
- **Routine Filters:** "Mondays are for gym, no work."
- **Blackout Dates:** Automatic pausing during vacations.

Liquid Load Balancing

100%

Zero-Maintenance Adjustment

When you add a new "Boulder" appointment mid-week, the engine instantly shifts the "Water" tasks around it. No more manual rescheduling; the system heals itself.

LLM Powered Planning

Goal Decomposition

Type "Renew Passport" and the AI generates every sub-task from photos to mailing.

Effort Estimation

AI suggests how long tasks will take, ensuring the splitter logic is realistic.

Natural Reset

Tell the AI: "I'm overwhelmed this week." It redistributes non-essential tasks instantly.

Built for Your Reality

The Student

Balance weekly labs with exam countdowns and rotating work shifts.

The Traveler

Automate packing lists and document renewals backwards from departure.

The Professional

Map complex project milestones around existing meetings and rosters.
